

TEGACTIVE

Integral control of gut tract

Natural Product
Antibiotic Free

With natural essential oils

TEGASA

ANIMAL NUTRITION SINCE 1965

TEGACTIVE

Integral control of gut tract

- Microencapsulated blend of organic acids and essential oils with a synergic effect
- Alternative to antibiotic growth promoters
- Control of intestinal microbial flora
- The combination of specific essential oils and plants extracts:
 - Control postweaning enteric disorders (E. coli diarrhea)
 - Control enteric disorders at the beginning of the grower-finisher phase (Dysentery, Ileitis, Salmonellosis, Clostridial disease ...)
 - Prevent infections due to Streptococcus suis (meningitis,...)
- Antioxidant and anti-inflammatory effects
- Helps to reduce antibiotic use in pig farming, decreasing the problems of resistance
- Improves piglets health and performance

Integral mode of action

- At a **gastric level** reducing pH: increases nutrient digestibility as protein and phosphorus. Less diarrhoea problems
- At **an intestinal level** it works as a **bactericide**:
 - Effective throughout the gastrointestinal tract as it allows for progressive release during digestion
 - Stimulating the beneficial flora (Lactobacillus)
- **Stimulates the secretion of pancreatic enzymes:** amylases, lipases and proteases improving nutrient digestibility and increasing the efficiency of feed use

Synergic effect of organic acids and essential oils:
