

# TEGAPROT PH

Vegetable protein concentrate

# TEGAPROT PH

Vegetable protein concentrate

## What it is?

Sources of high quality vegetable protein ideal alternative for **replacement** of **fish meal** in piglets feed.

- Ideal essential amino acids and oligopeptides profile.
- Low in anti-nutritional factors and excellent palatability that increases feed intake, especially in first stage of piglets feed.

## Why use it?

- High digestibility and palatability protein that stimulates feed intake.
- Improves productive parameters and intestinal health.
- Increases diet digestibility and reduces diarrhoea in piglets.
- Contains: Porcine mucosa hydrolysed protein, High soybean protein concentrate heat-treated (\*\*), Soybean meal (\*\*), Potato protein, egg protein.

(\*\*) Produced from genetically modified soybean.

## Analytical constituents

Crude protein	55.00 %
Digestible protein	50.90 %
Crude fat and oils	1.34 %
Crude fiber	3.30 %
Ashes	9.00 %
Lysine	3.50 %
Methionine	0.90 %
Threonine	2.35 %

### DOSAGE

Dose 2,5-15% in complete feed  
 CREEP FEED 7,5-15 %  
 PRESTARTER 5-12,5 %  
 STARTER 2,5-5 %

**FAMIQS**
