TEGAPHOS

SUPPLEMENTARY LIQUID FEED
TO ADMINISTRER IN DRINKING WATER

TEGASA proposes **TEGAPHOS**, a new supplement of liquid minerals and trace elements that strengths the skeleton of the birds and the shell of the eggs

PROPERTIES
- Protection of the skin and nicer feather (meat poultry – pullets' layers).
- Critical steps of growing.
- Metabolic unbalance for minerals deficiency.
- Better quality of the shell.
- Reduces the pH of the water and regulates the intestinal flora

COMPOSITION per Kg.:
Monopotassium Phosphate, Magnesium Chloride, Calcium Chloride, Sodium Chloride

ADDITIVES (L.):
Trace elements

Copper (Cupric Chloride dehydrate) - E4	560,00	mg.
Manganese (Manganese Chloride tetrahydrate) - E5	2.600,00	mg.
Zinc (Zinc chloride monohydrate) - E6	2.800,00	mg.

ANALYTICAL CONSTITUENTS:
- Ashes   22,30%
- Phosphorus   9,00%
- Calcium   1,40%
- Magnesium   1,00%
- Sodium   0,90%
- Crude protein   <0,30%

DESCRIPTION
Improves the formation and maintenance of the skeleton of the birds, the quality of the skin and integuments , and the hardness of the shell of the egg.

DOSAGE
- **POULTRY MEAT AND PULLETS LAYERS**
  From 1 to 3 ml / litre of water during 5 days / month.
  If necessary, the dosage could be 5 ml / litre of water during 5 days for technical prescription.
- **LAYERS**
  From 1 to 3 ml / litre of water during 5 days / month.
  If necessary, the dosage could be 10 ml / litre of water during 5 days for technical prescription.

HANDLING
Well agitate before to use.
To use gloves and protected glasses.

CAUTIONS
Be sure to feed with good transition.
Potable water ad libitum.
No withdrawal period needed.

PACKING
5 and 20 litres drums. Palletized.

EXPIRY
2 years

STORAGE
Store in a dry and fresh place, avoid light and sun. Keep well closed after each use.
Once opened, to use as soon as possible.
