

TEGASA

ANIMAL NUTRITION SINCE 1965

www.tegasa.com

COMPANY

Established in 1965, **TEGASA** (Técnica Ganadera S.L.) is a leader company serving Professional Animal Nutrition. We are specialized in manufacturing, developing and commercializing nutritional products for the animal feed industry.

Our success is based on our High Quality Products and our policy of constant innovation and fulfillment of the effective legislation. We have gained a reputation for reliability worldwide, both for customers and suppliers.

50 years
at the service
of Animal Nutrition

TEGASA is concerned to achieve strict quality rules in manufacturing processes and services, respect the environment and enforce the current legislation.

Our aim is to provide high quality products and help producers to attain excellent results and high profits.

TEGASA'S product range is supported by:

- **Qualified staff:** optimism, dedication and enthusiasm of all our members.
- **High Technology:** constant assessment and improvement on current trends.
- **Interest and Experience:** interest in the customers' success and in sharing our experience with all countries.

TEGASA is a recognized international company that serves to customers worldwide and adapts to the specific requirements of each country or culture.

Our company operates in different zones in Europe, North Africa, Southeast Asia, and Middle East, with the aim of expanding even more.

TEGASA'S goal is to offer start-to-finish personalized customer care, keeping in touch with evolving customer needs and offering a wide range of complementary services.

PRODUCTS

By constant research, development and innovative techniques, **TEGASA** works to improve a whole range of products in order to respond to market trends and anticipate the future needs of customers.

TEGASA has the resources to create and adapt new products, in real time, in response to the concept "**time to market**":

- Vitamin Premixes with micro and/ or macro minerals.
- Nutritional Supplements & Concentrates.
- Additives.
- Tailor-made Products.

FACILITIES

TEGASA has its technical, commercial and administrative services in the head office in Barcelona, and its own 4.500 square meters manufacturing center in Valls (Tarragona). Our own lab is also in our facilities in Valls (Tarragona), where qualified staff carry out an exhaustive quality control from the entrance of raw material to the exit of the finished product. This center has become one of the most automated and modern plants dedicated to animal nutrition and it was awarded in 1995 the ISO 9001 Total Quality Certificate.

The implantation of new technologies in our facilities allows us to give a fast answer to the technical and productive needs of the present market.

The reinvestment policy and permanently updated program ensure that industrial and technological facilities are perfectly adapted to market, environmental and legal requirements.

The continuous improvement in the control of the processes increases the quality of our products.

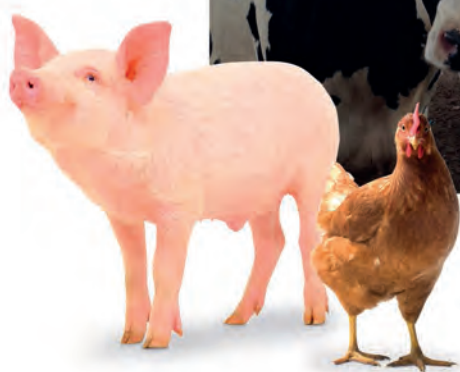

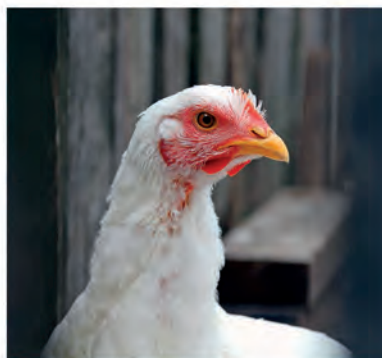

CERTIFICATIONS

TEGASA has been certified by **BUREAU VERITAS** according to **ISO 22000** Food Safety management systems and by **FAMI-QS** according to **GMP** (Good Manufacturing Practice) in the manufacture of its premixes for animal feed. These certifications reflect the company's commitment to continuous improvement and the pursuit of the highest quality in its products and processes.
